The direct ODE's Product16 gap lies mainly outside raw-affine error
Raw-affine error
Orthogonal remainder
Mean field MSE across five time panels
Gaussian2D / direct
Ring8 / direct
Product16 / direct
Gaussian2D / potential gradient
Ring8 / potential gradient
Product16 / potential gradient
1e−3
1e−2
ODE
S128
S192
S384
All 21 fixed predictors. Hatched S384 is the direct-readout cost control in both rows. No fitted correction is deployed.
