Means/ranges across six solves, not uncertainty. Raw P and local bias sensitivity do not bound the complete field.
Gaussian2D
Ring8
Product16
Raw P largest singular value
Affine bias RMS / input RMS
Local bias Jacobian Frobenius norm
Training update
ODE parent
Static bias
Affine forcing
c*b
Mean (D-cI)b
Centered (D-cI)b
Local diag(b) J_s
